WHO WE ARE

Specialist in rope access cleaning

Star cleaning and quality is a window facade specialist company based Eswatini with vast experience in rope access. Our company uses certified Technicians who are highly trained in heights and rope access.

Every scope is planned around the realities of the building: its height, access constraints, operating hours and finish requirements. From the first site assessment to final sign-off, our teams focus on safety, consistency and long-term asset value.

OUR MISSION

To deliver disciplined, site-safe building care that protects our clients' assets and presents their properties at their best on every visit.

OUR VISION

To be the most trusted facade cleaning and building maintenance partner in Eswatini and the wider region.

Sectors we serve

● Commercial offices

● Retail centres

● Industrial plants

● Residential estates

WHAT WE DO

Our service lines

Structured service delivery across cleaning, repair support and specialised access, resourced by trained crews and supervised zone by zone.

01

Window Cleaning

Streak-free interior and exterior window cleaning for commercial and residential properties.

02

Industrial Cleaning

Deep cleaning programs for factories, warehouses, plants and high-traffic production spaces.

03

Painting

Professional interior and exterior painting with careful surface prep and durable finishes.

04

Rope Access

Certified rope access teams for difficult and elevated cleaning or maintenance projects.

05

Signage

Sign board cleaning, maintenance and installation support to keep your brand visible.

06

Waterproofing

Targeted waterproofing solutions for roofs, facades and vulnerable water-entry points.

07

Joint Sealing

High-performance sealants for expansion joints and gaps to prevent leaks and weather damage.

One contract, one accountable team

Access planning, execution, quality checks and sign-off handled in-house.

OUR PROCESS

From first call to final sign-off

01

Site assessment and scope planning

We review the building, access points, risk factors and client priorities before quoting.

02

Safety and access method alignment

Access methods, equipment and permits are agreed and documented with the site team.

03

Service execution and quality checks

Trained crews deliver the scope with in-progress supervision and zone-by-zone checks.

04

Handover report and next-cycle planning

You receive confirmation of completed work and a recommended maintenance interval.

Standards we hold

Safety & compliance

Workflows built around risk control, trained teams and site-safe procedures.

Operational discipline

Clear scopes, accurate scheduling and reliable completion timelines.

Quality accountability

Final checks and service consistency standards on every assignment.

SELECTED WORK

Projects we have delivered

PROJECT 01

Corporate Tower Exterior Window Program

Facade Cleaning delivered a recurring exterior window cleaning program across a high-rise corporate tower. The scope included rope-access planning, weather-window scheduling, glass and frame detailing, and post-service quality checks for each floor zone.

PROJECT 02

Industrial Plant Deep Cleaning

During a planned plant shutdown, our teams completed deep industrial cleaning and surface preparation for protective coatings. Work covered high-traffic production areas, elevated structures and hard-to-reach zones using controlled access methods.

PROJECT 03

Retail Facade Restoration

This retail facade restoration combined signage cleaning and maintenance, exterior painting and joint sealing. The project improved curb appeal while strengthening weather protection across exposed facade joints and surface finishes.

On site

Further references and site photography available on request.

PARTNERS

Clients we serve

We support recurring maintenance programmes and once-off projects for organisations that expect predictable scheduling and consistent finishes.
